1.0 Introduction

The U.S. Environmental Protection Agency (USEPA), Region 9, under the authority of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) and the Superfund Amendments and Reauthorization Act of 1986 (SARA), tasked Ecology and Environment, Inc. (E & E) to conduct a preliminary assessment (PA) of the Neutronics Inc. site in Santa Monica, Los Angeles County, California.

The PA included a review of the findings of preliminary investigative activities conducted by Bechtel Environmental, Inc. and the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC). This report summarizes those findings.

2.0 Apparent Problem

The Neutronics site was identified as potential hazardous waste site and entered into the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) on July 29, 1994 (USEPA 1994a).

This site was discovered during the Santa Monica Site Discovery process conducted by Bechtel Environmental, Inc. in 1994. As recorded on the USEPA's Potential Hazardous Waste Site, Site Identification form, the site operated at its address from 1958-1959 (USEPA 1994b).

On behalf of the USEPA, the DTSC completed a Site Screening/Prioritization Checklist for the site. As part of this site screening, DTSC contacted federal, state, and local regulatory agencies for files related to the site; none of the agencies had any records. In addition, DTSC's site reconnaissance and review of site history did not indicate there had been a release of hazardous substances at the site. The following businesses have operated at the site address which was unoccupied at the time of DTSC's site visit:

- 1958-1959 Neutronics, Inc.
- 1960-1961 Resistron Labs
- 1994-1994? Streamline Pictures (Krug 2000, USEPA 1998, USEPA 1994c).

Because there are no documented releases of hazardous substances at this site, no further action by EPA's Superfund Program appears to be warranted.

3.0 Site and Hazard Ranking System (HRS) Considerations

HRS factors associated with this site were not evaluated because there is no documentation of a hazardous substance release at the site.

LATITUDE (x)

A) Number of ruler graduations between the 2.5' (150") grid lines

57.8 (a)

B) Number of ruler graduations between south grid line and the site reference point

41.5 (b)

C) Therefore, $\frac{a}{150''} = \frac{b}{x}$ i.e., $x =$ Latitude in decimal seconds, north of the south grid line

Expressed as minutes and seconds ($1' = 60''$) = 01' 47.70" N

Add to grid cell latitude = 34° 00' 00" N + 01' 47.70" N

Site latitude = 34° 01' 47.70" N OK WPL

C) Therefore, $\frac{a}{150''} = \frac{b}{y}$ i.e., $y =$ Longitude in decimal seconds, west of the east grid line

Expressed as minutes and seconds ($1' = 60''$) = 21.73" W

Add to grid cell longitude = 118° 27' 30" W + 21.73" W

Site longitude = 118° 27' 51.73" W OK WPL

DISCUSSION:

Mr. Krug informed me that the site, as well as the area surrounding the site, has been recently redeveloped. He recalls that the site address occupied the second story of a two story building and appeared to be vacant office space. He stated that this site did not appear to be using hazardous materials.

DISCUSSION:

Mr. Hodge explained to me that when the Neutronics Inc. site was entered into the CERCLIS database in 1994, a query was not made to see whether there was a corresponding site address in the RCRIS database. He also said that RCRIS tracks on-going businesses from 1994 through the present and he hypothesized that during that time, Neutronics, Inc. moved out of the site address and Streamline Pictures moved in. He adds there was no defined procedure for entering sites into the CERCLIS database in 1994.
